Issue #19 19 February 2026

NewAthena Science Community 2026 membership call is open!

The [NewAthena Science Community \(NASC\)](#) is the group of scientists supporting the development of the mission's science case. The NASC is organised into the following thematic Working Groups (WGs):

- Large-scale structure of the Universe
- Galaxies and supermassive black holes
- Stars and their environment
- Compact objects
- Transients and multi-messenger astrophysics
- Cosmology and fundamental physics
- Science Support

The 2026 membership call is open to scientists at any career stage, including students, post-doctoral researchers, faculty, research staff, retirees, and those in private enterprises involved in the NewAthena Study. No formal prerequisites are required. Further information and registration on [this webpage](#).

Deadline: 1st of March 2026.

Please share this announcement with colleagues who may be interested in joining our community.
